

## Whale Watching Post-Trip Activity

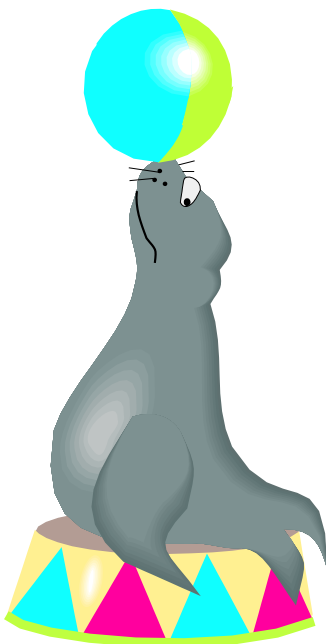

### Marine Mammals:

Whales, dolphins, seals and sea lions are mammals. Mammals are special from other animals like birds, fish and reptiles. Help the mother dolphin teach her baby about how he is special by circling the characteristics of mammals.

- Has Fur
- Has feathers
- Breathes air with lungs
- Has scales
- Is warm blooded
- Born from an egg
- Mother gives birth
- Babies eat meat
- Babies drink milk

### Sea Lions:

Answer the following questions to explain why this animal is really a sea lion and not a seal!

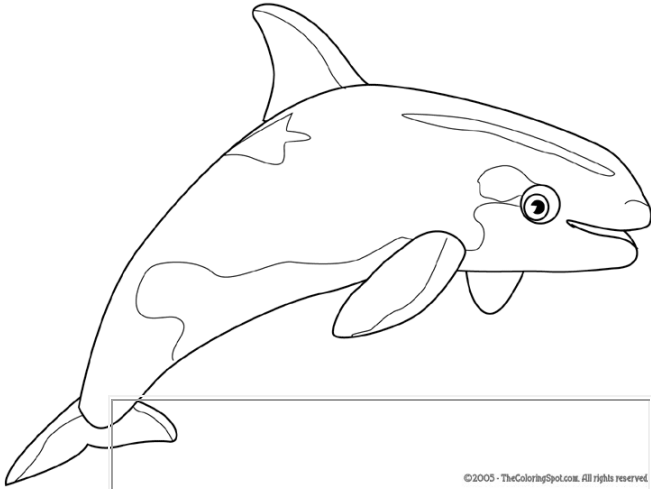

This word starts with an “F”. Sea lions can walk on their \_ \_ \_ \_ and seals can not.

This word starts with a “B”. Sea lions make lots of noise and can \_ \_ \_ \_ and seals can not.

This word starts with a “E”. Sea lions have \_ \_ \_ \_ that can be seen on the side of their heads and seals do not.

The orca or killer whale is a \_\_\_\_\_ whale.
